## 08. Can the employer search employees' possessions or files as part of an investigation?

### Switzerland

Author: *Laura Widmer, Sandra Schaffner*  
at Bär & Karrer

The basic rule is that the employer may not search private data during internal investigations.

If there is a strong suspicion of criminal conduct on the part of the employee and a sufficiently strong justification exists, a search of private data may be justified.<sup>[1]</sup> The factual connection with the employment relationship is given, for example, in the case of a criminal act committed during working hours or using workplace infrastructure.<sup>[2]</sup>

Electronic information created during employment would generally be owned by the employer and would be the employer's assets. If an employee is given a computer or laptop to use for work, the employer has the right to log into that device and take any data that is stored therein, provided that the data does not contain sensitive information of that employee and PDPA requirements are met.

To avoid any potential issues regarding physical data such as documents on the employee's desk, it is advisable to search those areas with the subject employee to show good faith. In practice, the employee

normally agrees to search those areas with the employer, or allows the employer to search alone.

## 26. How long should the outcome of the investigation remain on the employee's record?

### Switzerland

Author: *Laura Widmer, Sandra Schaffner*  
at Bär & Karrer

From an employment law point of view, there is no statute of limitations on the employee's violations. Based on the specific circumstances (eg, damage incurred, type of violation, basis of trust or the position of the employee), a decision must be made as to the extent to which the outcome should remain on the record.

From a data protection point of view, only data that is in the interest of the employee (eg, to issue a reference letter) may be retained during the employment relationship. In principle, stored data must be deleted after the termination of the employment relationship. Longer retention may be justified if rights are still to be safeguarded or obligations are to be fulfilled in the future (eg, data needed regarding foreseeable legal proceedings, data required to issue a reference letter or data in relation to a non-competition clause).<sup>[1]</sup>

There is no period required by law for keeping the outcome of the investigation on the employee's record. However, if termination of employment is the outcome of the investigation, an employer should keep details of the investigation for at least 10 years, in line with the prescribed period for an employee to file an unfair dismissal claim against an employer. An employer may use the details of an investigation to defend such a claim. For other disciplinary action, the retention of investigation details on the employee's record is at the employer's discretion.
