23. Should the investigation report be shared in full, or just the findings?

Switzerland

Author: *Laura Widmer, Sandra Schaffner*
at Bär & Karrer

In principle, there is no obligation to disclose the final investigation report. Disclosure obligations may arise based on data protection law vis-à-vis the persons concerned (eg, the accused). Likewise, there is no obligation to disclose other documents, such as the records of interviews. The employee should be fully informed of the final investigation report, if necessary, with certain redactions (see question 22). The right of the employee concerned to information is comprehensive (ie, all investigation files must be disclosed to him).[1] Regarding publication to other bodies outside of criminal proceedings, the employer is bound by its duty of care (article 328, Swiss Code of Obligations) and must protect the employee as far as is possible and reasonable.[2]

There is no obligation to share the investigation report or the findings unless the employer and employee agree to do so.

However, under Decree No. 13/2023/ND-CP on personal data protection, the contents of the investigation report or findings related to the employee are likely to constitute the personal data of the employee under

investigation. In that case, the employee may have a right under the said Decree to obtain copies of such documents by making a statutory data access request after the workplace investigation is completed. Where the employer is required to provide such documents to the employee under Decree No. 13/2023/ND-CP but the requested documents also contain the personal data of any other third parties (such as the employee's co-workers who participated in the interview during the investigation), the employer should first redact or erase such data before providing the requested documents, unless the relevant third parties have consented to the disclosure of their personal data.

24. What next steps are available to the employer?

Switzerland

Author: *Laura Widmer, Sandra Schaffner*
at Bär & Karrer

If the investigation uncovers misconduct, the question arises as to what steps should be taken. Of course, the severity of the misconduct and the damage caused play a significant role. Furthermore, it must be noted that the cooperation of the employee concerned may be of decisive importance for the outcome of the investigation. The possibilities are numerous, ranging, for example, from preventive measures to criminal complaints.^[1]

If individual disciplinary actions are necessary, these may range from warnings to ordinary or immediate termination of employment.

After the completion of the investigation, the employer may:

- take the appropriate labour disciplinary action against the employee;
- proceed with legal action against the employee (eg, reporting the criminal violations of the employee to the proper authority or filing a civil lawsuit against the employee before the court); or
- adopting preventive or remedial measures on how to avoid these violations and to mitigate the damage to the company (eg, reviewing internal policies and conducting employee training).
